UNIQUE NATIVE **BS** 24" X 48" + STAINLESS STEEL DÉCORATION KIT

Feri & Masi, is a Portuguese brand of Pavigrés Group, specialized in the manufacture of porcelain tiles with an outstanding know-how in unglazed double-loaded products.

Worldwide present, the Pavigrés Group is proud of its quality heritage and focus on what is truly essential: simplicity and beauty.

PUREVER is the word we created to link the name of our two catalogues: PURE and EVER.

In the PURE catalogue we present three Architectural Collections, offering completely unglazed porcelain tiles made by a unique double and triple-loading process with hyper granulometric reduction. The PURE products are the nature in its purest state and are proudly made to bring us back to basics, back to the material.

UNIQUE COLLECTION

Unique is a stunning Collection of unglazed double and triple-loaded porcelain stoneware. It offers an endless number of concrete plates with incomparable raw touch and ultimate design.

This exclusive Collection achieves the real identity of concrete through a very ingenious production process.

It starts with the double-loading operation made with powder homogenization and hiper granulometry reduction, providing a grain diameter with less than 0.005". When producing UNIQUE **BE** and UNIQUE **BS** a third loading is applied using GRT-Grain Repulsion Technology®.

As a result, we get a very compact powder pressed by hydraulic isostatic vertical presses with more than 1 024 081 psf.

Pieces are then shaped through a high-speed mechanical process and fired in an extra long cycle at the temperature of 2246 °F.

Automatic squaring and rectification operations are finally performed in all pieces to guarantee squareness, monocaliber and modularity.

An amazing surface with an exquisite three dimensional effect that brings concrete imperfections alive. Bubbles, sheens and salt migration spots are the result of the GRT - Grain Repulsion Technology® used on the third loading.

UNIQUE **BE** is a distinctive product made of unglazed triple-loaded porcelain specially designed to be applied in interior and exterior walls.

It's advisable the use of joints without grout. We recommend at least a 5/64" joint.

An incomparable surface full of concrete imperfections, bubbles, sheens and salt migration spots, made with the use of GRT - Grain Repulsion Technology®. UNIQUE BS is produced with four milled holes reminding us the concrete formwork performed with wood and hooks by artisans and builders.

UNIQUE BS is a product made of unglazed triple-loaded porcelain designed for interior and exterior wall coverings. It can be supplied with two fixing-kits: one in stainless steel and another in iron. It is also possible to be supplied with the same hardware but only for decorative purposes.

It's advisable the use of joints without grout. We recommend at least a 5/64" joint.

The Granity Air Collection offers the elegance of natural stone in its purest form.

It is a unique architectural product completely made of unglazed double loaded porcelain. Due to its superb technical performance, the Granity Air Collection is suitable for all possible applications, including very high traffic places.

The Granity Air production begins with the "Dry Colortech" operation. The coloured powder goes through a hyper granulometric reduction process until it reaches a grain diameter of 0,005". This thin powder is homogeneously spread over another layer of non-reduced powder and afterwards both undergo a force of 7111.67165 lb/in² carried out by a hydraulic isostatic vertical press.

Tiles are then fired in an extra long cycle at 2246 °F and automatically rectified in order to guarantee monocaliber and full modularity for all sizes.

Composed by ten different sizes, ten colors and four different surfaces all in the same $\frac{27}{64}$ " thickness with the exception of the Polished finish, the Granity Air Collection offers the Architect a wide range of nearly than 400 different porcelain tiles.

SOLID COLLECTION

10 COLORS
5 SIZES
3 SURFACES

The Solid collection is a new must, the state of the art in unglazed double-loaded porcelain stoneware. Its chromatic simplicity and unique textures are clearly meeting the trends of contemporary architecture.

This collection is the perfect product to design minimalist environments, being ideal, not only for residential use, but also for public places where high traffic is expected.

The Solid manufacturing starts with the hyper granulometric reduction operation, from where a grain diameter of less than 0,005" is obtained. This thin powder is then homogeneously spread over another layer of non-reduced powder and both undergo a force of 7111.67165 lb/in² carried out by a hydraulic isostatic vertical press.

Tiles are then fired at a temperature of 2246°F creating a very hard surface with an extra strong mechanical resistance. Automatic squaring and rectification operations are finally performed in all pieces to guarantee monocaliber and full modularity for all sizes.

Composed by five different sizes, ten colors and three different surfaces all in the same 10.8mm thickness, the Solid Collection is a suitable product for all applications including public projects where high traffic is expected.
